CAREER OBJECTIVE

Results-oriented recent college graduate with an Advanced Diploma in Computer Engineering Technology (3.5 GPA), working towards a BSc in Computer Science, and 2+ years of work experience. Aiming to leverage academic experience and a proven knowledge of full stack mobile development and modern development tools to successfully fill the developer role at your company. Frequently praised as proactive by my peers, I can be relied upon to help your company achieve its goals.

EXPERIENCE

FULL STACK DEVELOPER

Nexus Health, North York, ON / Mar 2020 – Present

A fast-passed start-up environment requires passionate and adaptive developers ready to fill many roles. While at Nexus Health, I:

- Lead the development of complete front-end rewrite, with React Native and Typescript.
- Worked closely with the design team to bring their vision to life.
- Automated the build, delivery and release process with GitHub Actions.
- Consolidated, simplified and streamlined the mobile back-end with AWS Serverless Application Model, DynamoDB and Lambda.

INFORMATION TECHNOLOGY SUPPORT SPECIALIST (CO-OP)

AGS Automotive Systems, North York, ON / Jan 2018 - Aug 2018

- Created a NodeJS script to automatically retrieve bandwidth charts from our ISP for every company site and archive them as per company policy.
- Install and maintain network and other IT assets.
- Providing technical support for all AGS employees by utilizing remote administrative tools.
- Managing IT assets and working with the IT team to maintain critical network infrastructure.
- Creating and updating IT and Help Desk standard operating procedure documentation as well as creating and analyzing resource reports (i.e. Bandwidth utilization).
- Implement new hardware assets such as laptops, phones, servers, etc. While maintaining records off all assets and their configurations.
